INSTALLATION INSTRUCTIONS

STEP.1

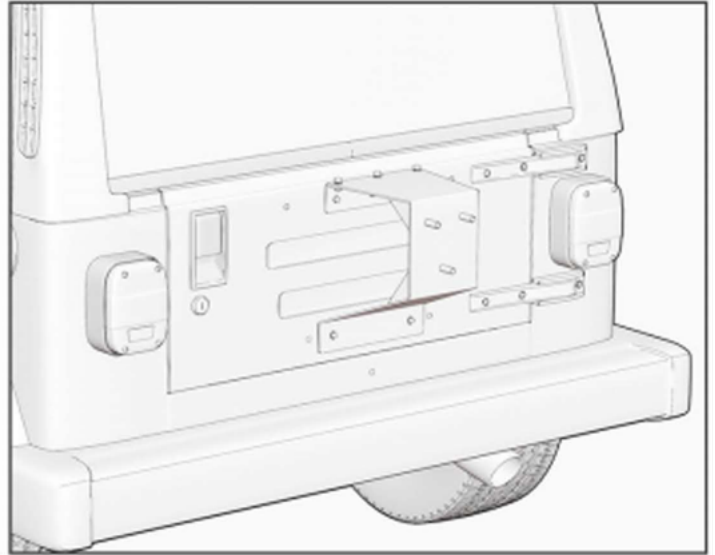

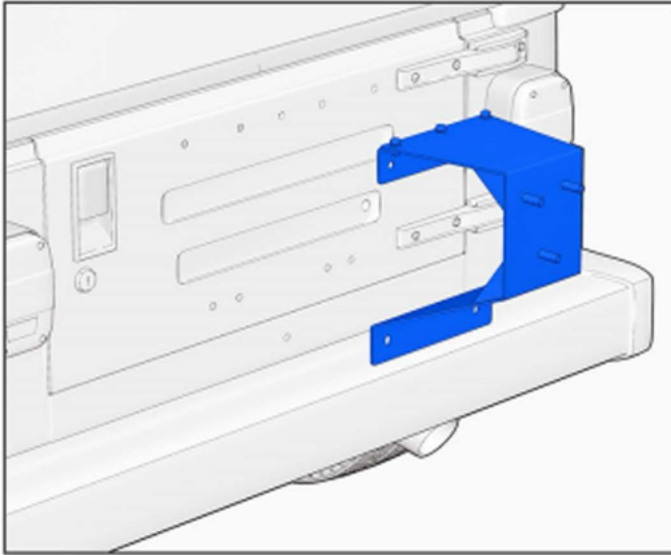

* As shown in the diagram, first assemble the provided main part A01 with bracket A02, and secure them using the supplied M8 bolts.

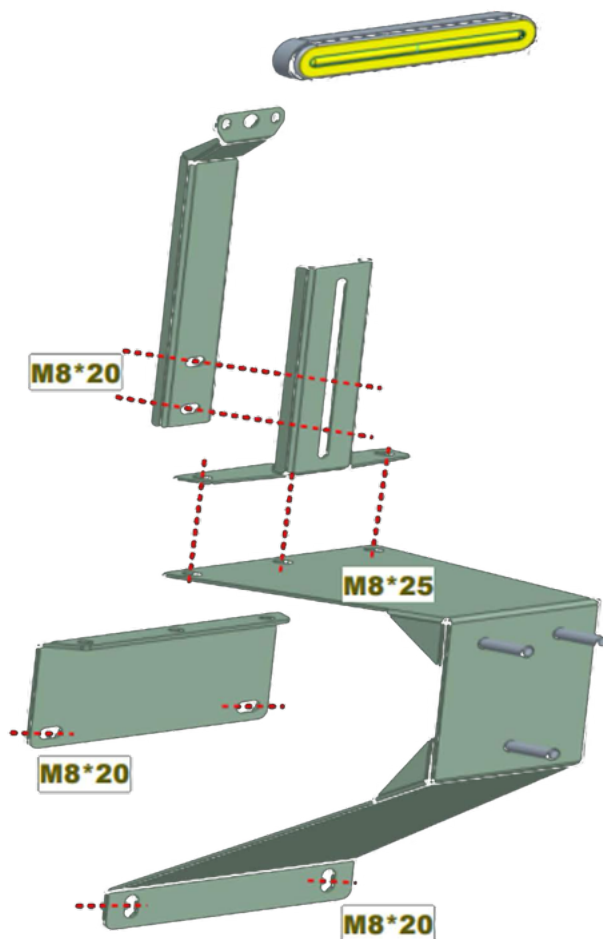

As shown in the diagram, first remove the spare tire and the tail lights from the vehicle. Be sure to keep the original bolts, as they will be used for reinstallation later.

INSTALLATION INSTRUCTIONS

As shown in the diagram, align the assembled spare tire bracket with the mounting holes, then use the original bolts to securely fasten it in place.

PLEASE NOTE:

1. If you have any product issues (missing parts, damaged parts, damaged packaging etc.), please contact our email. Thank you!

2. We sincerely hope that you will contact us for further assistance before requesting a return or refund.

3. We are not responsible for damage to the product or property (including vehicles) or death caused by improper installation or use of the product.
